Local and General

E. H. Morrow and D. Ontkes
were visitors to the city on Saturday
last.

J. R. Gilechrist, our local station
agent, arrived home again on Friday
last after his recent serious illness.
He is still far from well, but hopes
after a short rest to be fit for duty
again.

The Departmental Examinations
are advertised to take place as usual,
commencing June 18th. Crossfield
will be one of the centres.

Mrs. Wilson and Mrs. McLeod are
the delegates from the local W.A.
to the W.A. Conference to be held
at Calgary during the coming week.

Art Sackett attended the Bull
sale at Lacombe on Wednesday.

The census list of Alberta villages
and towns gives Crossfield a popula-
tion of 244.

The Rev. H. M. Horricks is
attending the Methodist Conference
at Calgary. Service as usual at the
Union Church at 7-30 p.m. on Sun-
day.

Mr. E. H. Morrow has been ap-
pointed examiner for the Didsbury
district in connection with the forth-
coming Departmental Examinations

Six degrees of frost was registered
on Tuesday night.

A. K. McLean, who has been
spending a week in Vancouver re-
turned home on Wednesday.

For Sale.—Young Purebred Duroc
Boars. For particulars apply W.
Urquhart. Phone 307.

Addition to the Prize List for 1917
for the Crossfield and District Agri-
cultural Fair in Classes 1, 2, 3, 4
and 5, Section 6 in each case. Dry
Mare or Gelding, 1st prize \$10.00,
2nd prize \$5.00.

Only three weeks more until Fair
Day, June 20th and 21st. Every-
one is earnestly requested to forward
their entries to the Secretary or
Manager of the Fair at The Canadian
Bank of Commerce, at the earliest
date possible. Please do not delay
forwarding your entries as soon as
possible for in doing so you will save
the management a great deal of work
at the last moment.

On Tuesday 22nd Private Melvin
Casey, who has recently enlisted in
the 78th Batt., took his departure
from Crossfield. The station plat-
form was crowded with his many
friends and High school chums who
gave him a hearty send off. On
Thursday 24th, at nine o'clock p.m.
he left Calgary for "somewhere in
Eastern Canada," where the bat-
talion will train before going over-
seas.

We all wish "Baldy" the greatest
success, good luck, and a speedy and
safe return.

Farmers insure your Build-
ings in the Wawanesa Mut-
ual Fire Insurance Co. A
Company of the Farmers and
for the Farmers only. Costs
only about 35 cents a year for
\$100 Insurance.

Chas. Hultgren, Agent.

Will YOU Give 3-¹/₂ Cents a Day
to Keep

A Child From Starving?

If you will, read this appeal carefully then decide what share you will take in helping avert the greatest tragedy of all time.

1,250,000 CHILDREN ARE FACING SLOW STARVATION IN BELGIUM TODAY.

The Belgian Relief Commission has not the means to supply these growing children with the food that is necessary. **THE SITUATION IS SERIOUS.** This great relief fund has largely been administered through Americans; the break between the States and Germany has brought about a crisis; there is more need of funds now than at any previous time.

**THE GREAT RELIEF WORK MUST AND WILL GO ON.
WE MUST DO OUR SHARE.**

At the present time the growing child in Belgium receives only a "hunk of bread and a bowl of soup" each day. It is not enough; they must have more—or starve.

For 3 1-3 cents a day the Relief Commission can supply one child with an extra "meal" of a biscuit made with fat or lard and a cup of cocoa, not much, but it is the difference between life and death, between health and disease, for the children of heroic Belgium.

**ALBERTA HAS BEEN BLESSED WITH TWO RECORD-
BREAKING CROPS.**

We are prosperous—the future looks bright—we are in a position to help. How many starving children can you look after? How many will we look after?

HOW MANY WILL YOU FEED?

\$12.00 a year, the price the Alberta farmer received for eight bushels of his wheat, will give this extra "meal" to one child for a whole year. 10c a day or \$36.00 a year will keep three children from starvation. \$60.00 a year will feed five; \$120.00 a year will feed 10.

WERE YOU EVER HUNGRY?

Can you picture starvation, the pinched faces, the piteous cries?

IF THE CHILDREN WERE STARVING IN ALBERTA you would help—

YOU WILL HELP IN THIS CASE

You can't pass by the children's cry for food from starving Belgium **AND YOU MUST ACT NOW**

The thought that you are feeding some of these unfortunates each day will bring you happiness. Think of the eager little hands reaching for the meal you supply.

Your own meals will taste sweeter when you do your share. The paper in which you are reading this is doing its share by publishing this appeal without charge—**WHAT WILL YOU DO?**

You may send contributions by the week, month, or in one lump sum. You are **ASSURED** that your money is used for the purpose it is sent.

**THERE ARE HUNGRY CHILDREN AWAITING YOUR
DECISION. HOW MANY WILL YOU FEED?**

Send cheques payable to—

Belgian Relief Fund

FOR SOUTHERN ALBERTA,

and address them to J. H. Woods, Hon. Secretary-Treasurer, Southern Alberta Committee, Herald Building, Calgary.

ROBERT WHITFIELD,
PRINTER AND PUBLISHER.

CROSSFIELD, Alberta, June 1, 1917.

Control of Garden Insects

The Entomological Branch of the Dominion Department of Agriculture has issued Circular No. 9, on "Common Garden Insects and their Control." This publication includes an account of the more important insect pests of the vegetable and flower garden. It has been prepared for wide distribution at this time when everywhere throughout Canada efforts are being earnestly made to increase the production of vegetable foods, etc., in back yards, vacant lots and other areas near cities and towns. The remedial measures for controlling the common destructive species and also formulae for the making of the chief insecticides are given. For easy reference the insects are grouped under the crop or flowering plants they infest. Gardeners will find this publication a most useful means for solving many troubles that will arise. Application for this Entomological Circular No. 9 should be made to the Chief of the Publications Branch, Department of Agriculture, Ottawa. Insects concerning which further information is desired should be sent with a covering letter to the Entomologist, Department of Agriculture, Ottawa. Envelopes and letters so addressed up to 11 ounces in weight may be forwarded free of postage.

Musical Evening on Friday Next for Red Cross

A Piano Recital given by Miss Creighton and her pupils, assisted by Mrs. Wilson, Mrs. Horrie, Mr. Schofield, Mr. Jose and Mr. McGee. To be held in the I.O.O.F. Hall, on Friday Evening, June 8th, at 8 o'clock. The Crossfield Orchestra will be in attendance, and a most enjoyable time is expected. As this is the first time our pupils have given a piano recital in Crossfield we hope a large crowd will turn out and encourage the efforts made by Miss Creighton and her pupils.

Admission 50c.
Proceeds to go to the Red Cross Fund.

The following Programme will be rendered:—

| 12 Piano Duet | Misses Burrows and Gemmill |
| 13 Vocal Solo | Mrs. Wilson |
| 14 Pageant | Class |
| | God Save the King. |

No Railway Tickets

In the early days of railways in Great Britain the Chancellor of the Exchequer would not issue tickets to tax payers, for the simple reason that they did not exist. The adventurous traveller who journeyed by rail presented himself at the booking office about an hour before his train, some time, and a clerk leisurely took down his name and address and other particulars, which he entered on a way bill like so much goods. He then gave him a receipt, and this constituted the contract note for his journey.

PUBLIC NOTICE.

A Sitting of the DISTRICT COURT will be held at CROSSFIELD, on FRIDAY, JUNE 8th, commencing at 10 a.m.

A. G. BROWNING,
Deputy Attorney General.
Dated at Edmonton,
25th May, 1917.

A NEW BREED OF CATTLE

Dexters may be said to be a new breed of cattle, at least they are not largely known, which is shown by the fact that the 25 head which comprised an exhibit of this stock, at a fair in British Columbia, is said to be the largest of the breed ever shown in America. In fact, it is said that no Dexters or French-Canadians have ever been shown at any of the Eastern fairs. The Dexters while little known comparatively, are said by people who have studied their characteristics to be the best cattle in British Columbia for the small farmer and the householder. They are a little black animal, seldom ranging more than 40 inches in height, docile, easily kept, hardy, and excellent milkers. They are also said to be in spite of their smallness, the steers maturing early, and the meat usually commanding from two to three cents more per pound than other breeds.

The average is less than 100 eggs per hen per year. First aim to make that average 120 eggs. Then go to 150 eggs. A. M. finally, that is possible, reach the 200-egg record.

[Copy] Certified copy of Pedigree Recorded in the Clydesdale Stud Book of Canada.

CYMO

[13515]

Light Bay, face and legs white, foaled June 12th, 1911, bred by P. M. Bredt and Sons Regina, Sask., foaled the property of P. G. Swann, Crossfield, Alta.

Sam. C. Fleming,
Owner.

With a Tank Crew

Tank Is Like a Giant Wedge in a Cut of Butter

Virtually all of the members of the British "tank" crews have been decorated with the military cross. And along with the report of the decorations, comes the first narrative of the sensations of a man within the "tank" during an attack.

A French machine gunner who was in one of the "tanks" during their first use at the Somme writes in the magazine *Lecture Four Town*:

"It sounds like a myriad of hailstones beating against the window panes of a moving train, when in a 'tank' under infantry fire.

"We are in the front line with our 'tanks,' in little groups of crews. There are the crew of the *Crete de Menthe*, of the *Diplodocus*, and one ironically styled the *Boches Victory*.

"Suddenly the glare of a rocket lights up the sky, followed by ten twenty, thirty, and so on, until the whole sounds strangely in our prison. The hour has really come; we are to start. My heart is beating violently. I do not know why. One needs to have 'sea legs' in this carcass of steel.

The motor system of the engine is gripping the skin, sticking to it, gliding and dragging itself along like a centipede. As we advance, the earth everywhere around our track is plowed up and thrown aside. Heavens, how stifling it is!

"A heavy thud and then a flash over my head. Our tank is trembling from top to bottom of the shock for the eighth of a second. We have just fired. This perpetual rimbuling over my head has been the effect of the machine recoils, the air vibrates. 'Tock! Tock! Tock! Tock!'

Arms of look-out, some of them on the steel sides of our tank. The German guns have opened fire on us. But they have as much to say to our machine as pellets of bread against a wall.

"Splinters of wood jump up on all sides of us. I have the sensation of being in the interior of a gigantic iron wedge which is cutting through something like butter. We fire with out casing, hand on gun, and eye glued to the look-out pierced in the middle with the sweat pouring down our foreheads.

"Another violent shock, a heavy blow and a crashing. We were going straight through a wall. We are pulverizing machine guns. Grenades burst upon our armor. We are in the midst of the 'nest.' All at once German heads with terror on their faces appear on both sides of us. Now it is my turn and that of my comrades. Our machine guns crackle.

"The Germans are the greatest disorder. They throw themselves flat on their stomachs, they raise their arms to heaven, some of them try to run away. A whistle sounds in the tank and it stops. Then wild cheers come faintly to my ears. I see our boys in possession of the German 'nest.'

In the Form of a Parable

Wherein the Citizen Had All the Chances Against Him

A man notorious as a killer called up the police and said:

"If any citizen can shoot me down the street without wearing a red and white blazer I shall step out from my hiding place and kill him."

This threat was noticed about, and one citizen who had business away from home went to the police to report it. After five days the police answered:

"We shall not send a policeman with you, as you have suggested. You have a perfect right to walk the streets."

The citizen inquired what would happen if the author of the threat made it good. The police replied:

"Manifestly, you will be shot. As for our action, that is something to be decided after the act. You may be sure that we will then take vigorous steps."

This closed the conversation, leaving the citizen just where he had been five days before.—New York Sun.

A little girl was dipping her doll's pinafore in a basin. So her father, who had been with her, said:

"What are you doing, Nellie?"

"I'm trying to dye my pinafore red, papa."

"Red! And what are you doing it with?"

"Beer, papa."

"Beer! Why, whoever told you beer was a dye?"

"I heard mama say it was beer that made your nose so red, so I thought—"

"Here, Mary, take this child away."

Keeping Back the Tide

The general council of the bar association of England has passed a motion declaring against the admission of women to the practice of law. These learned gentlemen ought to remember the famous story:

Mrs. Partington, who sought to keep back the Atlantic tide with her broom.—Vancouver Sun.

Lady (engaging a pageboy): Well, how soon can you come?

Page: At once, my lady.

Lady: But surely you present mistress, may I like that?

Page: Oh, yes my lady, my lady. She'll be only too glad to get rid of me!

The War Toll of the Blood

Some Peasage in Danger of Extinction Through Loss of War

Close upon 120 sons of peers have so far fallen in the campaign, and of this number no fewer than 62 were heirs to titles of nobility. A peer has lost two heirs in succession, Lord de Blaquiere being the latest victim of the dire bereavement, which has also fallen upon Lord Stratheden and Campbell has lost son and eldest grandson.

In a number of cases the war has resulted in peerages being in danger of extinction through the deaths in action of the only heirs. Unless action is taken in the form of new creations, with special remainders, the marquises of Lincolnshire and the baronets of Knaresborough, Playfair, Ribblesdale, Rosmead, Stamfordham, St. Davids, and de Blaquiere are likely to lapse.

In addition, 16 holders of peerages, have given their lives for the Empire, there being no heirs in two cases, and in another, the leaving of a seven-year-old boy to inherit the honors.

One of the saddest losses in the peerage was the death of the Marquis of Viscount Creighton shortly before his father, the Earl of Errie, died of wounds in the trenches.

Lord Langatow, a seven-year-old boy to inherit the honors.

Ian Hay on Preparedness

Captain Beith Points Out What Lack of It He Sees in America

"National training in America? There I am neither qualified nor entitled to offer advice. I know the difference between the British and American as it is in this matter. I know that this vast country of yours is not so well equipped as this small country, and that so long as your enormous tide of immigration continues to pour into your country, it is impossible to develop a national sense of personal responsibility.

But in this great subject of preparedness, I can refer you to the case of my own country—not as an example, but as a warning. We were caught unprepared. In consequence we had to sacrifice our best, our very best, the kind that we could not replace in any country, just because they hurried to the rescue and allowed themselves to be wiped out while the country behind them was being aroused and organized.

But in this great subject of preparedness I can refer you to the case of my own country—not as an example, but as a warning. We were caught unprepared. In consequence we had to sacrifice our best, our very best, the kind that we could not replace in any country, just because they hurried to the rescue and allowed themselves to be wiped out while the country behind them was being aroused and organized.

City Ways for Country Stores

Country Merchant Can Utilize City Store Methods to Good Advantage

A department store has a fine trade from the surrounding farming sections because the proprietor pays the most attention to keeping country customers informed about what is going on in the store as he does to keeping city customers posted.

This merchant utilizes his country patronage. He considers it worth a good deal of effort to make it a mistake to think that country customers are either small buyers or bargain hunters. They are not. Many of them still cling to the end-of-the-week buying habit, which he caters to. They also have a keen eye for such legitimate bargains as occur in every store through stock moving.

Against they are attracted every now and then by the regular arrival of new merchandise in his different departments.

The store appeals to them most of all as a place where something is always happening in merchandise.

Much has been said of the handicaps suffered by country stores in competition with city stores, and the chief difficulty is that customers of the average country store have never been taught to wait.

But something interesting in merchandise may happen at almost any time. The country merchant gets in goods from week to week. But his customers usually have to discover for themselves what is new in ribbons, shoes, crockery or breakfast foods, because he does not advertise in the city papers.

From time to time the country merchant could gather up dead ends of stock, such as overstocked at cut prices, turning them into money and fresh stock. The city stores have such sales as are rare in country stores.

In meeting competition the country merchant has attracted too much importance to the fancied attractions of cheapness. Here is a skillful city store which has learned that cheapness is not the best appeal to country customers.

But one thing you can discern, for it is borne in on you with every wind of change, is that the country store is increasing power, mobility, morale stands against a force decreasing in strength.

The country merchant can do this. Today the Franco-British armistice is an essentially unbroken line of soldiers and workers, pursuing their many tasks of transport.

Their trenches, batteries, lines of communication, are more constantly in the hands of the enemy. Their guns, and are more often raised, as the result of offensive actions, small in scale, but of great importance.

Platinum \$100 per Ounce

War Has Almost Completely Cut Off Supply of Metal in Europe

The war in Europe has cut off the supply of platinum. In December this heaviest of metals reached the United States at \$100 an ounce—four times the price in 1908, and more than four times the value of an ounce of gold. The warring nations have forbidden their citizens to export platinum, because it is an element of war.

This shortage has greatly inconvenienced manufacturers of fine jewelry and of electrical, photographic, dental and surgical supplies. In Germany many manufacturers have already substituted where they can an alloy of rhodium and palladium, two other metals of the platinum family. Instead of platinum wire, American manufacturers of electrical supplies are using for the wire in electric lamps, wire made of nickel-chromium, metallic tungsten or molybdenum. For the ignition points of spark plugs they are using tungsten and for the resistance wires of electric furnaces, molybdenum. Most of the platinum used in the United States is a small area in Russia among the Ural mountains where the metal occurs in deposits of alluvial gravel along the banks and beneath the beds of the rivers.

On the Western Front

Everything Indicates the Ascendancy of the Franco-British Armies

I will simply reiterate the impression that nearly every other observer carries away with him, namely, that the Franco-British armies, in effect, the only land front of final consequence—the main issue is decided. It must be an immense moral and material conditions. At the front you are constantly hearing the material is yours. You do not see the other. You have the reports which you hope and expect will be confirmed, you have not the reports that may set the special facts you note or are detailed to you in a more particular manner. But one thing you can discern, for it is borne in on you with every wind of change, is that the country store is increasing power, mobility, morale stands against a force decreasing in strength.

The country merchant can do this. Today the Franco-British armistice is an essentially unbroken line of soldiers and workers, pursuing their many tasks of transport.

Their trenches, batteries, lines of communication, are more constantly in the hands of the enemy. Their guns, and are more often raised, as the result of offensive actions, small in scale, but of great importance.

The Mind of a German Soldier

Only Hope for Fatherland Is Destruction of the War Party

Here is an extract from the diary of a German soldier in the 10th regiment, taken prisoner in France, published in the *Manchester Guardian*.

"The war is a low, scoundrelly affair. The German government does not

The Squire's Sweetheart

—BY—
KATHARINE TYNANWARD, LOCK & CO., LIMITED
LONDON, Melbourne, and Toronto

(Continued.)

"I do not know that it is like me as I see myself shavering in the morning," the Squire had said, "but I do know that Waits might have painted it."

Lionel Egerton swore in huge delight that he had never done anything so good. It should go to the Academy, with Myrick's permission. The Squire, meanwhile, pending Mrs. Egerton's talking her husband over, had gone up to London, after laying the cheque in Mrs. Egerton's sea-green lap, where her fingers softly folded it.

He had things to tell Hilary. After all, it was not so bad what he had to report. Hilary would see things as he saw them. There was nothing of what he would have hated to convey to the boy. There was only a puzzle, a bewilderment.

He had told the Vicar the result of his visit to Mr. Langton. They had agreed that there was nothing to be done. Neither man would, he could, have taken the responsibility of sending Lady South back to her brutal husband. But the Vicar, at Margolds, despite his clinging to his master, had told Mrs. Ellison and Mrs. De Montmorency, when they called together, that Sir Gilbert lived much as usual. He sat at table every day, his riding whip to his hand, as though his wife and daughter might walk in at any moment.

"I've took the whip from him myself often," he had added; and it was red after he had lashed Miss Margaret with it. He never laid it on her Ladyship, as I know, but he did let Miss Margaret have it. There, he is a brute."

The repetition of this story had an immediate effect on public opinion in Silverdale.

Mrs. De Montmorency detailed the story one day when she met the Squire in her characteristic way of a light cruelty.

"Isn't it like an opera-bouffe?" she said. "Do you suppose the wicked old wretch really sits there with the riding whip waiting for his unfortunate daughter? or is it only a brilliant invention of a butler who has mistaken his vocation?"

"I only know," said the Squire stiffly, "that Lady South's friends and Margaret's, who have placed them beyond the reach of her brutalities, are abundantly justified."

"Oh," said Mrs. De Montmorency, "you know all the time the person I who knew all the time! Who could have believed it of you?"

For once the Squire showed a quality of fineness with which no one would have credited him. He took Mrs. De Montmorency into his confidence.

"I believe I may trust you," he said most untruthfully, and told Mrs. Pritchard afterwards that he had literally seen the lady's ears move. "Supposing the lover were only a trusted old friend? And supposing Lady South were like the die of the life she was leading? Supposing she had to be taken away for medical treatment and that she took so much persuasion that the old friend had to be called in, not once, but many times, before she would accept the chance of saving her life? I only say—supposing."

"Oh, you wretch, you've been in it all the time. I believe the Vicar was in it too. What a pair of conspirators! Do tell me more."

"There's no more to be told," Mrs. De Montmorency went off, shaking a playful finger at the Squire and told the next person she met in strict confidence that she knew where Lady South and Margaret had taken refuge from the brutality of old Sir Gilbert. As for the lover story, "there was nothing in it, my dear. Only an old doctor friend who came to persuade her to save her life and keep her wretched old husband from the gallows." She could tell more if she liked but of course, as it was told to her in strict confidence.

After all, the scandal about Lady South was stale. There was no great difficulty in letting it go. And to be sure, the Squire's visits to, and intimacy with those odd people at the New Cottage had not done much for the neighborhood. It was not chosen to call on Mrs. Egerton. It

had a distrust of artists unless they were hung at the Royal Academy and were making money.

"Do tell me about your friends at the New Cottage," Mrs. De Montmorency said the next time she met the Squire. "The little girl with the orange-colored hair, and that pretty woman who dresses so oddly and walks about so languidly, they do their own kitchen work, I hear?"

"Mrs. Egerton is Lord De Tracy's niece," said the Squire, and left Mrs. De Montmorency to digest that amazing piece of information, having caught sight of Mr. Pritchard walking across the common.

He caught up with the Vicar by asking a question beyond Mrs. De Montmorency's power to emulate. She looked after the Squire regretfully for a minute or two. She had never before found him so communicative. Then, realizing the impossibility of him, she only consoled herself with the thought of the bonne bouche she had extracted from him, and went off to share her budget with some of her cronies.

Mr. Pritchard had a slight misgiving on his brow. He took things to heart, as though he came out of the cloister instead of being the incumbent of an English village.

He smiled absently at the Squire's account of his two meetings with Mrs. De Montmorency. The Squire's grave pleasure in his own powers of fineness must have provoked a smile in the least humor-minded.

"They go on from one thing to another," he said. "They must always be smirching someone. If it is not Lady South it is another. Not Mrs. De Montmorency this time, but the villagers. You are a friend of the Egertons, Squire. Could you not give a hint to Egerton to keep that fellow Cooper from being so much about the place? He has not a good reputation, even here, where they are not very particular. The fellow is no fit associate for ladies—or good girls, either, if what I hear of him be true."

"They do not say anything against—Miss Egerton?"

The Squire saw red. He was shaken out of his natural self-control. His voice sounded a little thick.

"They do not say anything—against Miss Egerton?"

"I did not encourage the gossip, of course. It is stupid to give countenance to such things. They have some ground for thinking it odd that he should be accepted there."

The Squire had said this, bidding Hilary to expect him. He would not disappoint the boy again, but he wanted to stay. He did not quite know why he wanted to stay nor what he expected to do. But something like this he said to himself. He had seen all the time that Cooper's friendship with the Egertons would set people to talk. And of course, people being brutes they were, they would fix on his innocent Dolly as very sick of his company. He must be protected at all costs. If only she would give him the right to lift her head, and his poor little girl whom no one wanted, his treasure of price!

He used to speak more plainly to Egerton. He had learnt that Draper, Cooper's brother-in-law, was very sick of the fellow's visits. He had come for a week in the preceding winter. He had stayed on month after month, and now, midsummer was a thing of the past. Draper, who had built an ugly little Dissenting Chapel at the back of his shop, had conducted services there himself on Sundays, whose shop was a curiosity and whose wife was in the inn and outer walls—you could buy nothing at Draper's without being confronted with a hired text—was ill-pleased at having a cast-away Cooper beneath his roof. But Mrs. Draper—a little woman who kept her husband in awe of her, was devoted to her brother, so there he stayed.

The Squire went up to town very much preoccupied, and hating to go. He did not like the fellow's visits. He had an early dinner, for he was returning to Silverdale the same night. No use in the Squire telling the boy that he had to go, that something drew him back, some pretension of the dinner when it was in torture to be gone.

There were moments during the dinner when it was in torture to be gone. Hilary suggested, which would have meant Hilary giving up one dance and arriving late at the theatre. The summer night was lovely in London, where the west wind brought in country smells of new hay and ruffed the great river till the stars it reflected were broken in to shimmering gold-dust. The Squire did not see it. He was on tenterhooks. He might have been eating savoury for all he knew.

The Torpedo

Engine of Destruction the Invention of an Englishman

When a German U-boat sends a torpedo on its mission of destruction it is utilizing a weapon of British origin, since the modern locomotive torpedo was the invention of Whitehead, a British engineer. It was in 1877, forty years ago, that the Whitehead torpedo first came into notice. Whitehead's original torpedo carried twenty-six pounds of gun-cotton and travelled eighteen knots. The twenty-one-inch Whitehead torpedo now in use carries 330 pounds of gun-cotton and has a range of over six miles, at a speed of thirty knots. At a range of four miles its speed is about forty-five knots. The explosive is packed in the head of the torpedo, and is usually gun-cotton. According to the Germans, what they call trinitrotoluene. The explosion is caused by a steel rod which projects a few inches beyond the head of the missile. When this rod or striker comes in contact with any yielding substance, such as a ship's side, it is pressed back against the detonation, and woosh!

No Doubt About It

Landlord—I've called to collect the rent.

Little Boy—Please, sir, mamma's out and forgot to leave it.

Landlord—How do you know she forgot it?

Little Boy—Because she said so.

MOTHERHOOD
WOMAN'S JOY

Suggestions to Childless Women.

Among the virtues of Lydia E. Pinkham's Vegetable Compound is the ability to correct sterility in the case of many women. This fact is well established as evidenced by the following letters from hundreds of others we have published in these columns.

Poplar Bluff, Mo.—"I want other women to know what a blessing Lydia E. Pinkham's Vegetable Compound has been to me. We had always wanted a baby in our home but I was in poor health and not able to do my work. My mother and husband both urged me to try Lydia E. Pinkham's Vegetable Compound. I did so and my health was restored."

proven and I am now the mother of a fine baby girl and do all my own house work."

Almond St., Poplar Bluff, Mo.—"In many other homes, once childless, there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong."

Write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice—it will be confidential and helpful.

Railway Attendant (to man smoking)—You can't smoke.

The Smoker—So my friends say. Railway Attendant—But you mustn't smoke.

The Smoker—So my doctor says. Railway Attendant—Well, you shan't smoke.

The Smoker—So my wife says. Does your wife believe everything you tell her? "Yes, she believes everything I tell her is wrong."

Manitoba's Demonstration Farm
Manitoba's first demonstration farm will be growing luxuriant crops this summer, if weather conditions are propitious. This farm, the first of a series that will eventually cover the province, is situated near the town of Birtle, Man. It consists of 320 acres and it will be the purpose of the demonstration farms to illustrate what can be done in the way of rotation of crops, scientific agriculture and stock raising. More half-section plots will be added from time to time.

World's Food Crop Low
Expert Says the Grain Supplies Fall Far Under the Normal Requirements

The world's food crop is deficient and the situation is becoming alarming, according to David Lubin, American representative of the International Institute of Agriculture.

Mr. Lubin is urging the imperative necessity of mobilizing American agricultural resources. To a correspondent of the Associated Press Mr. Lubin said:

"For the first time in many years there exists a deficit in the supply of corn, wheat, rye, barley and oats, estimated at a total of 150,000,000 bushels less than the normal requirements for countries open to trade. The situation is worse than was expected last October. The institute's reports indicated then a surplus of more than enough to feed the world until August of this year, when the new crops began to come in."

"We must profit by Europe's experience before meal tickets become necessary. We can avoid high prices by the eliminating of waste, by the growing of more food and also by effective organization of our food supply, which is more important than getting men into the army."

"Two months after the beginning of the war Germany forbade the use of wheat or rye for feeding livestock, and two months later requisitioned all supplies of food. Our first duty is to prevent the manipulation of food supplies thus obtaining an effective mobilization through the same plan which the Germans are using."

"What is embodied in senate bill 5973."

Old Dutch

To Bore for Potash

Drilling for potash will be undertaken in northern Alberta during the coming summer by interests representing Baron Rhonda of Cardiff, Wales. It has been announced at Edmonton that work will be commenced at the salt beds on the Salt River, near Fort Saskatchewan, a rotary drill will be employed in the operations, and a definite attempt will be made to ascertain if there or not potash exists in sufficient quantities to warrant the beginning of a mining industry. The salt measures will be bored through, and it is believed that at a workable depth below them the potash will be struck, as the geological formation of the district is of the kind that is found in potash beds.

BABY'S OWN TABLETS AN EXCELLENT REMEDY

When the baby is ill—when he is constipated, has indigestion, colds, simple fevers or any other of the many minor ills of little ones—the mother will find Baby's Own Tablets an excellent remedy. They regulate the stomach and bowels thus banishing the cause of most of the ills of childhood. Concerning them Mrs. Paul Dineen, Cheneville, Que., writes:—"I can recommend Baby's Own Tablets to all mothers as I have used them for my little one for constipation and diarrhoea and have found them an excellent remedy." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

No Place for Spectators

There is a comparison which every man can make for himself. If he thinks that a hard thing is being asked of him when he is required to transfer from work which does not help the nation in the war to work which is essential for the attainment of victory, he should in all candor put to himself the case of the soldiers in the trenches or the sailors on the seas, who are not only facing discomforts and privations of the wildest proportion, but risking life and limb for the security and protection of our country and empire. Here, it is, as the Secretary for Scotland said, no room for spectators in this drama. If a man cannot fight for his country, he can, and must, work for it in some other capacity.—The Scotsman.

German Vandalism

All the Peace Conferences Must See Regions Devastated by the Huns

Von Hindenburg's devastation of the country which is partly military, partly political and partly punitive. If he could, he would make it a sparsely and unbroken glass, easily swept by his artillery. Nature forbids that, with her hills and rivers; but he does the best he can. Then he probably desires to impress upon the French people what his northern departments will look like if they continue to drive him back over them. He foolishly imagines that this may incline them to the imposition of peace terms. The Allies should now make it a fixed rule that no diplomat can be permitted to sit in any peace conference who has not seen the brutally devastated sections of France and Belgium—of Poland and Serbia—of Rumania and Armenia.—From the Montreal Star.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

Her Secret

Mrs. Andrews—Has Mrs. Tompkins any intellectual life?
Mr. Andrews—Well, if she has she conducts it surreptitiously. In the absence of her husband—Life.

A Cure for Fever and Ague—Disturbance of the stomach and liver always precede attacks of fever and ague, showing derangement of the digestive organs and deterioration in the quality of the blood. In these ailments Earmouth Vegetable Pills have been found most effective, abating the fever and subduing the ague in a few days. There are many who are subject to these distressing disturbances and to these there is no better preparation procurable as a means of relief.

Indisputable Authority

The young husband laid down his piece of cake and regarded his wife as she ate the cake.
"Dearie," he began, diplomatically, "I suggest that there is something wrong with this cake. It really doesn't taste very good."
"That's your imagination," said the wife, with a triumphant smile. "I made it exactly as set forth in the cookbook, and the cookbook says it's delicious."

Catarrh Cannot be Cured

With LOCAL APPLICATIONS, as they cannot reach the seat of the disease, Catarrh is a local disease greatly influenced by constitutional conditions, and in order to cure it one must take an internal remedy. Catarrh is taken internally and acts through the blood on the mucous surfaces of the system. Hall's Catarrh Cure was prescribed by one of the best physicians in the country for years. It is composed of some of the best medicines combined with some of the best blood purifiers. The persistent combination of the ingredients of Hall's Catarrh Cure is what produces such wonderful results in catarrhal conditions. Send for immediate relief.

J. C. GILLEN & CO., Prop., Toledo, O.
Hall's Catarrh Pills for constipation.

Double Barreled Revenge

Wilkinson was near the exploding point when his neighbor met him in the street.
"That man Potter," he burst out, "has more trick than anybody I ever met."
"Why, what has he done?" asked the neighbor.

"He came over to my house last night and borrowed a gun to kill a dog that kept him awake at night."

"Well, what of that?"
"What of that?" shouted Wilkinson. "It was my dog!"

Nothing In It

She—Do you believe in phrenology?
He—No. As an experiment I once went and had my head read, and I found there was nothing in it.

War and Insanity

Statistics Show Marked Reduction in Madness Since Struggle Began

Probably the average man is under the impression that war has a tendency to increase lunacy. It is indeed generally considered that anything so exceedingly perturbing effect upon the human mind and cause innumerable cases of mental derangement. Paradoxical, however, as it may seem, war has just an opposite result. As to the returns issued by the various asylum authorities since the war began, there has been a marked reduction in insanity. It might, of course, be suggested that this is due to the fact of so many men being drawn away from the distracting competition of the industrial world into the army, where life, if more precarious is more varied and interesting. This, no doubt, is a contributory cause. But recent returns show a reduction amongst women as well as men.

What, then, are the general reasons adduced by the experts for this satisfactory state of things? Well, in times of peace they tell us that life is dreary and monotonous, and in order to vary their existence, people resort to forms of amusements which, instead of affording them genuine recreation or gratification, only produce languidness and ennui. Hence, instead of the great work-out, it dispels the monotony of our lives, and gives us serious and practical things to consider. Hence, instead of causing intellectual breakdown, it rather generates new intellectual energies.

PERSONALS.

A Prominent Ontario Woman Speaks.

Welland, Ont.—"I am glad I heard about Dr. Pierce's remedies. When I was tired-out and worn-out I used 'Golden Medical Discovery' and 'Favorite Prescription.' It is true that they are great remedies, and I found that they built me up and made me feel like a new person. I believe I used seven bottles in all. I have recommended Dr. Pierce's remedies to several of my acquaintances. 'I have one of the Common Sense Medical Advisers and think very highly of it.'—Mrs. MAY CLARK, 117 State St., Welland, Ont.

Dr. Pierce's Golden Medical Discovery is a tonic and builder that brings new activity to the liver, stomach and bowels in a short time, thus causing salivary, indigestion and constipation to disappear.

Good blood means good health; good health means strong men and women, full of vigor and action, with mind and muscles ever willing. Any medicine dealer will supply you with Dr. Pierce's Golden Medical Discovery in either liquid or tablet form. Send to Dr. Pierce, Invalids' Hotel, Buffalo, N.Y., for free medical advice.

Dr. Pierce's Common Sense Medical Adviser—a great doctor book—of 1000 pages, cloth bound—answers many important questions. Copy will be sent, complete, for 50 cents (or stamps) to pay wrapping and mailing charges.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated and easy to take as candy.

Wholesale Coupling

There is a clergyman in an Ohio city who is very proud of his record as a marrying parson.
"Why, sir," said he to a Cincinnati man, who was visiting him, "I marry about fifty couples a week, right here in this parsonage."
"Parsonage?" returned the Cincinnati man, "I should call it the Union depot."

Crossfield, Alta.

Dear Sir:

On behalf of the Belgian Relief Committee for Southern Alberta, I have pleasure in acknowledging with thanks receipt of your favor of May 23rd, enclosing bank draft for \$110.35, being the proceeds of wheat drive, etc., held by some of the ladies of Crossfield and district in aid of Belgian Relief. Will you please convey to the ladies the appreciation of the committee for their efforts. Acknowledgement will be made in the papers as usual to-morrow.

Yours very truly,
J. H. WOODS,
Hon. Sec.-Treas.
Belgian Relief Committee for
Southern Alberta.

Notice to the Public.—On and after May 26th the Crossfield Meat Market will be run on a Strictly Cash basis. The price we are compelled to pay for our line of goods makes this step necessary.

W. TIMS.

WEST LAND REGULATIONS.

THE sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any Dominion Lands Agency (but not Sub-Agency), on certain conditions.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$3.00 per acre.

Duties.—Six months residence in each of three years after earning homestead patent; also 80 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Duties.—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.00.

The area of cultivation is subject to reduction in case of rough, stony or scrubby land. Live stock may be substituted for cultivation under certain conditions.
